Mr. Theodor H. Nelson
Harcourt, Brace & World, Inc.
757 Third Avenue
New York, N. Y. 10017

Dear Mr. Nelson:

Thank you very much for your letter of January 26, 1967, regarding our CRT display print systems. We have developed a light-exposed and heat-developed CRT print out paper which provides a quality black and white positive print. The exposure time is one or two seconds with four seconds for processing and delivery. The paper has a line resolution of approximately 100 lines per millimeter over its 8 1/2 X 11 inch dimension. In our present program, we are selling the device on an OEM basis to EDP and display equipment manufacturers. They in turn will offer it to the user, hopefully in late 1967. Therefore, we ask that you contact your EDP and display supplier for information on its availability in your area.

Thank you very much for your interest in our computer graphics programs.

Very truly yours,

A handwritten signature in dark ink, reading 'Rolf E. Westgard'. The signature is fluid and cursive, with a long horizontal stroke at the end.

Rolf E. Westgard
